ABOUT US

Thakur Electronics is a trusted name in Contract Manufacturing Services for electronics items in India. As an OEM and Electronic Manufacturing Services Provider in India, we offer a range of services related to the design, manufacturing, assembly, and testing of electronic products on behalf of other companies across India. Our manufacturing unit is located in Mumbai, Maharashtra (India).

As an Electronic Contract Manufacturing (ECM) service provider company, we play a crucial role in helping businesses bring their electronic products to market efficiently and cost-effectively by various ways. Our services include electronic items assembling & manufacturing, PCB designing, layout and fabrication, PCB KIT assembling, Final KIT fitment in plastic enclosure, component sourcing and procurement, quality control and testing, laser marking facility, injection molding machines, spray painting, Coil manufacturing etc.

As one of the leading Electronic Contract Manufacturing Company in India, we play integral roles in the electronics industry's ecosystem, working collaboratively to deliver high-quality electronic products to the market. Our USP is in-depth knowledge of manufacturing processes, assembly techniques, and quality control measures and the ability to offer comprehensive solutions and expertise in various aspects of electronic product design, manufacturing, and assembly services across the country.

USP

MAKE IN INDIA

Manufactured in India following highest quality standards

MANUFACTURING EXPERTISE

In-depth Experience of manufacturing processes with excellence

VOLUME PRODUCTION

Large-scale manufacturing of electronic products efficiently

MIN LEAD TIME

Committed to delivery in full, on time

**OUR LOVE FOR MANUFACTURING
AND OUR CUSTOMERS DRIVES
WHAT WE DO, WHO WE ARE,
AND HOW WE DO IT...
EVERY DAY.**

SERVICES

As an experienced Original Equipment Manufacturer (OEM) & Electronic Manufacturing Services (EMS) company in India, we extend our capabilities, experience, industry reputation, quality standards and ability to meet specific project requirements. These services leverage the OEM's expertise in design, production, and quality control to assist clients in bringing their products to market. Here are some of the contract manufacturing services that we are offering,

Electronic Manufacturing Services (EMS)

Electronic Items Assembling

PCB Designing, Layout & Fabrication

PCB KIT Assembling

Final KIT fitment in Plastic Enclosure

Component Sourcing and Procurement

Quality Control and Testing

Laser Marking Facility

Injection Molding Machines

Spray Painting

Coil Manufacturing

Volume Production

VISION

"Empowering Innovation through Seamless Electronics Manufacturing". Thakur Electronics is continuously evolving itself to excel in manufacturing process through delivery of high quality products and services.

MISSION

Thakur Electronics is committed to achieve its mission by satisfying its customers through innovative, reliable manufacturing solutions & high quality services. Providing high quality production and maximum customer satisfaction is our KEY.

CORE VALUES

Thakur Electronics never stops improving its services and production capabilities. These core values create a positive work environment, foster strong relationships with clients and partners, & guide the company in achieving its long-term vision & goals.

- **Quality Excellence** : Committed to delivering products and services of the highest quality that meet or exceed industry standards and client expectations.
- **Customer-Centric** : Focused on understanding and fulfilling client needs, building strong relationships, & delivering value-added solutions.
- **Innovation** : Dedicated to fostering creativity, continuous improvement, & technological advancements in electronics mfg.
- **Integrity & Ethics** : Upholding the highest standards of honesty, transparency, and ethical behavior in all interactions.
- **Reliability & Accountability** : Taking ownership of commitments, being accountable for actions, & delivering on promises.
- **Cost Effectiveness** : Efficiently managing resources & processes to provide cost-effective solutions without compromising quality.
- **Continuous Learning** : Promoting a culture of ongoing learning, skill development, and staying updated with industry trends.
- **Commitment to Excellence** : Striving for excellence in all aspects of operations, from product design to mfg. to customer support.

INFRASTRUCTURE AND FACILITIES

Thakur Electronics manufacturing unit is located at Vasai, Mumbai, Maharashtra (India). Our manufacturing set up is well equipped with modern high-tech machinery, programmed with precision and accuracy to deliver unmatched output and timely delivery all over India. The production units are equipped with State-of-the-art production facilities with advanced machinery and assembly lines. Our infrastructure consists of a systematic segregation of various units with dedicated spaces for testing product functionality, performance, and quality. Warehousing facilities to store components, raw materials, and finished products. Inventory management systems for efficient supply chain operations. Engineering teams for PCB layout, design optimization, and technical expertise. Professionals responsible for sourcing components, managing suppliers, and ensuring timely material availability. Robust IT systems for managing orders, tracking production, and communication. Project managers overseeing production timelines and coordinating deliverables.

As a leading contract manufacturing service provider in India our infrastructure integrates these elements to create a seamless and efficient manufacturing process that aligns with industry best practices and client requirements. It allows us to deliver high-quality electronic products at scale while maintaining flexibility and responsiveness to changing market demands.

WHY THAKUR ELECTRONICS

OUR CLIENTS

With over two decades of extensive experience in meeting and exceeding the demands of the industry, we continue to enjoy the patronage of some of the distinguished corporate in India.
